
Volume 47 Subject Index

- Abstinence syndrome, 39
Acclimation, 283, 307, 326, 370
Acclimatization, 364
Addiction, 39
Agricultural animals, 364
Amyloid, 225, 259
Anesthesia, 103
Animal acclimation, 281
Animal model, 39, 234, 243
Animal models, 73, 181, 186, 358
Animal models of CMV vaccine, 65
Animal models of the fetus and newborn, 1
Animal preparation, 281
Animal welfare, 118, 358
Apoptosis, 225
Asphyxial brain injury, 32
Atherosclerosis, 243
- β -cell apoptosis (*Psammomys*), 212
Background strain, 124
Behavior, 124, 348
Behavioral test suites, 124
Beta-cell, 225
Biology, 348
- Cardiovascular disease, 243
Chemosensitivity, 15
Chimpanzees, 316
Chronic lung disease, 1
Colony housing, 124
Colony management, 326
Congenital central hypoventilation syndrome, 15
Congenital infection, 49
Control of breathing, 1
Controls, 132
Corrosion casting, 103
Cytomegalovirus, 49
Cytomegalovirus (CMV) vaccines, 65
- Dependence, 39
Desensitization, 316, 370
Development, 22
Developmental origins of adult disease, 73
Diabetes, 225, 259
Diagnostic pathology, 156
Differentiation, 22
Dog, 326
Dominance, 294
- Early experience, 294
Embryo, 103
Endothelium, 22
Environment, 283
- Epithelium, 22
Ethics, 118
Excitotoxicity, 32
Experimental design, 5
Experimental unit, 5
Exposures, 73
- Feline, 234
Felines, 186
Ferret, 348
Fetus, 73
Flanking genes, 124
Functional genomics, 163
- General health, 124
Genetic background, 132
Genetic modifiers, 132
Genetically engineered, 141
Genetically engineered mice, 94, 118, 132
Genetically engineered mouse models, 199
Genetics, 15, 294
Genotype, 163
Glucose, 186, 259
Glucose intolerance, 243
Glycoprotein B, 65
Grant proposals, *ILAR e-Journal*
Guinea pig, 65
Guinea pig cytomegalovirus, 65
- H-IAPP transgenic mouse, 225
Habituation, 316, 370
Health, 316
High-energy diets, 212
HIP rat, 225
Homeostasis, 370
Hormones, 259
Human cytomegalovirus, 1
Human newborns, 15
Husbandry, 307, 348, 358
Hypercapnia, 15
Hyperinsulinemia, 212
Hypoxia, 15
- IACUC, 118, 370, *ILAR e-Journal*
Immune ontogeny, 49
Immune system, 364
Immunomodulation, 141
Inbred mouse strains, 199
Inbred strain, 94
Inbred strains, 132
Insulin, 186, 199, 259
Insulin resistance, 181, 212, 243, 259
Insulin-resistant *Psammomys* protein kinase C ϵ , 212
Insulin-signaling negative feedback, 212

Internet, 163
 Intrauterine pathogenesis, 49
 Islet amyloid, 234
 Islet amyloid polypeptide, 234
 Islet amyloid polypeptide (IAPP), 225
 Islet cell hypertrophy and disruption (*Acomys*), 212

 Just in time, *ILAR e-Journal*

 Knockout, 22, 141
 Knockouts, 132

 Lactation, 73
 Learning and memory, 124
 Leptin, 199
 Limit of viability, 1
 Litter effect, 5

 Magnetic resonance imaging, 103
 Management, 307
 Marmoset, 307
 Mesenchyme, 22
 Metabolism study, 281
 Methodology, 348
 Mice, 141
 Mice pups, 32
 Microbial infections, 141
 Microinjections, 103
 Miniature pig, 358
 Minipig, 243
 Models, 348
 Monkeys, 259
 Mouse, 124, 163
 Mouse pathology, 156
 Mouse resource center, 94
 Murine cytomegalovirus, 65
Mustela, 348

 Neonatal brain injury, 1
 Neonatal opiate dependence, 1
 Neonate, 39, 73
 Neonates, 5
 Newborn mice, 15
 Nomenclature, 132
 Nonexperimental variable, 283
 Nonhuman primate model of HCMV pathogenesis, 49
 Nutritional diabetes, 212

 Obesity, 199, 243, 259
 Opiate withdrawal, 39
 Owl monkey, 307

Pan troglodytes, 316
 Pancreas, 259
 Pathology, 141
 Peroxisome proliferator-activated receptor, 199
 Phenogenomics, 163
 Phenotype, 103, 118, 141, 163
 Phenotype pathology, 156

 PHS Policy, *ILAR e-Journal*
 Physiological effects, 364
 Placenta, 65, 73
 Plethysmography, 15
 Pregnancy, 73
 Premature infant, 1
 Primates, 186
 Protocols, *ILAR e-Journal*

 Rabbit, 283
 Rabbits, 32
 Random mutagenesis, 156
 Rat, 163
 Rat pups, 32
 Refinement, 283
 Relocation, 294
 Reproduction, 348
 Research, 326
 Respiratory, 22
 Restraint, 326
 Rhesus macaque, 49
 Rodent, 283
 Rodents, 186, 364

 Sensorineural deficits, 49
 Separation, 294
 Sex differences, 181
 Signaling, 199
 Socialization, 326
 Squirrel monkey, 307
 Statistical analysis, 5
 Stress, 283, 294, 326, 364
 Subject selection, 316, 370
 Subspecies, 94
 Swine, 186, 243, 358

 Targeted mutagenesis, 156
 Temperament, 294
 “Thrifty gene” hypothesis, 181
 Titi monkey, 307
 Tomography, 103
 TORCH infection, 65
 Training, 307, 316, 326
 Transgenic, 141
 Transgenics, 132
 Transplacental transfer of maternal immunoglobulin G, 49
 Transportation, 364
 Type 2 diabetes, 181, 199
 Type 2 diabetes mellitus, 234, 243

 Ultrasonography, 103

 Variability, 370
 Vascular, 22
 Virus, 141

 Website, 163
 Welfare, 283, 316
 Wild-derived strain, 94
