

ILAR Journal Current and Back Issues Order Form*

Bulk pricing per issue: 1-10 copies \$40 ea; 11-50 copies \$35 ea; 51-100 copies \$30 ea; 101+ copies \$25 ea. Call ILAR for cost for out-of-print photocopies.

*Prices above include US shipping charge, for international orders please add \$5 for 1st copy and \$1 for each additional copy ordered.

Year	Issue	Topic	Quantity	Price ea	Total
2009	50(2)	<p><i>Gene Therapy in Large Animal Models of Human Genetic Diseases</i></p> <ul style="list-style-type: none"> • Introduction: Gene Therapy in Large Animal Models of Human Genetic Diseases • Gene Therapy for Lysosomal Storage Diseases (LSDs) in Large Animal Models • Gene Therapy for Inherited Metabolic Disorders in Companion Animals • Large Animal Models of Neurological Disorders for Gene Therapy • Protein Replacement Therapy and Gene Transfer in Canine Models of Hemophilia A, Hemophilia B, von Willebrand disease, and Factor VII Deficiency • Potential Large Animal Models for Gene Therapy of Human Genetic Diseases of Immune and Blood Cell Systems • Gene Therapy in Large Animal Models of Muscular Dystrophy • Gene Therapy in Large Animal Models of Human Cardiovascular Genetic Disease • AAV-Mediated Gene Therapy for Retinal Disorders in Large Animal Models • Large Animal Models of Genetic Disease: Pertinent IACUC Issues 			
	50(1)	<p><i>The Neurobiology of Social Behavior</i></p> <ul style="list-style-type: none"> • Introduction: The Neuroscience of Social Behavior • Neuroendocrinology of Social Behavior • Evaluating the Neurobiology of Sexual Reward • Olfactory Regulation of the Sexual Behavior and Reproductive Physiology of the Laboratory Mouse: Effects and Neural Mechanisms • Communication of Adult Rats by Ultrasonic Vocalization: Biological, Sociobiological, and Neuroscience Approaches • The Biopsychology of Maternal Behavior in Nonhuman Mammals • Optimization of Laboratory Conditions for the Study of Social Behavior • Behavioral Studies and the IACUC: Challenges and Opportunities • Adequate Veterinary Care for Animals in Research: A Comparison of Guidelines from Around the World • Proceedings of the Conference on Swine in Biomedical Research 			
2008	49(4)	<p><i>Animal Use Oversight: Balancing Risk Management with Burden</i></p> <ul style="list-style-type: none"> • Introduction: Mitigating Risk, Facilitating Research • A Guide to Risk Assessment in Animal Care and Use Programs: The Metaphor of the 3-Legged Stool • The Institutional Official and Postapproval Monitoring: The View from 10,000 Feet • Postapproval Monitoring and the IACUC • Postapproval Monitoring and the Role of the Compliance Office • A Sample Postapproval Monitoring Program in Academia • Program Oversight Enhancements: The Other "PAM" • Avoiding an Overzealous Approach: A Perspective on Regulatory Burden 			
	49(3)	<p><i>Detection and Management of Microbial Contamination in Laboratory Rodents</i></p> <ul style="list-style-type: none"> • Introduction: Microbes and the Evolution of Scientific Fancy Mice • Opportunistic Infections of Mice and Rats: Jacoby and Lindsey Revisited • Lurking in the Shadows: Emerging Rodent Infectious Diseases • Old Enemies, Still with Us after All These Years • New Building, Old Parasite: Mesostigmatid Mites—An Ever-Present Threat to Barrier Facilities • From Bench to Cageside: Risk Assessment for Rodent Pathogen Contamination of Cells and Biologics • Role of Housing Modalities on Management and Surveillance Strategies for Adventitious Agents of Rodents • Institutional Responsibilities in Contamination Control in Research Animals and Occupational Health and Safety for Animal Handlers • International Harmonization of Health Monitoring • Rodent and Germplasm Trafficking: Risks of Microbial Contamination in a High-Tech Biomedical World 			

	49(2)	<i>Microbial Quality Control for Nonhuman Primates</i> <ul style="list-style-type: none"> • Introduction: Challenges in Microbial Quality Control for Nonhuman Primates • Specific Pathogen-Free Macaques: Definition, History, and Current Production • Nonhuman Primate Quarantine: Its Evolution and Practice • Development, Application, and Quality Control of Serology Assays Used for Diagnostic Monitoring of Laboratory Nonhuman Primates • New Approaches to Tuberculosis Surveillance in Nonhuman Primates • Impact of Infections and Normal Flora in Nonhuman Primates on Drug Development • Opportunistic Infections in Immunologically Compromised Nonhuman Primates • Nonhuman Primate Infections after Organ Transplantation • Macaque Models of Human Infectious Disease 			
	49(1)	<i>Noninvasive Bioimaging of Laboratory Animals</i> <ul style="list-style-type: none"> • Introduction: Bioimaging of Laboratory Animals: The Visual Translation of Molecular Insights • Considerations for Laboratory Animal Imaging Center Design and Setup • Anesthesia and Other Considerations for in Vivo Imaging of Small Animals • Introduction to Rodent Cardiac Imaging • Small Animal Imaging with Magnetic Resonance Microscopy • Small Animal PET Imaging • Functional Studies in Living Animals Using Multiphoton Microscopy • Multiplexing with Multispectral Imaging: From Mice to Microscopy • Brain Imaging in Nonhuman Primates: Insights into Drug Addiction • Noninvasive Bioluminescence Imaging in Small Animals • High-Resolution fMRI Maps of Cortical Activation in Nonhuman Primates: Correlation with Intrinsic Signal Optical Images 	Out of print		
2007	48(4)	<i>Animal Models Used in the Study of Movement Disorders</i> <ul style="list-style-type: none"> • Introduction: The Use of Animal Research in Developing Treatments for Human Motor Disorders: Brain-Computer Interfaces and the Regeneration of Damaged Brain Circuits • Animal Care and Use Issues in Movement Disorder Research • Stem Cells, Regenerative Medicine, and Animal Models of Disease • Nonhuman Primate Models of Parkinson's Disease • Animal Models of Huntington's Disease • Rat Models of Upper Extremity Impairment in Stroke • Rat Models of Traumatic Spinal Cord Injury to Assess Motor Recovery • Monkey Models of Recovery of Voluntary Hand Movement after Spinal Cord and Dorsal Root Injury • Learning-based Animal Models: Task-specific Focal Hand Dystonia 			
	48(3)	<i>Use of Amphibians in the Research, Laboratory, or Classroom Setting</i> <ul style="list-style-type: none"> • Introduction: The Art of Amphibian Science • Amphibians Used in Research and Teaching • Facility Design and Associated Services for the Study of Amphibians • Amphibian Biology and Husbandry • Reproduction and Larval Rearing of Amphibians • Diseases of Amphibians • Medicine and Surgery of Amphibians • Amphibians as Animal Models for Laboratory Research in Physiology • Amphibians as Models for Studying Environmental Change • IACUC Issues Associated with Amphibian Research • Amphibian Resources on the Internet • Appendix: Compendium of Drugs and Compounds Used in Amphibians 			
	48(2)	<i>Training and Adult Learning Strategies for the Care and Use of Laboratory Animals</i>			
	48(1)	<i>Contemporary Topics for Animal Care Committees</i>	Out of print		
SUBTOTAL					
<i>International orders: add shipping and handling, \$5 first issue, \$1 each additional issue</i>
